Philosophy/Goals/General Objectives

0200 - BP

DISTRICT GOALS

As part of the Governing Board’s responsibility to set direction for the school district, the Board shall adopt long-term goals focused on the achievement of all district students. The district’s goals shall be aligned with the district’s vision, mission, philosophy, and priorities.

In developing goals and identifying strategies to achieve those goals, the Board and Superintendent shall solicit input and review from key stakeholders. The Board shall also review and consider quantitative and/or qualitative data, including data disaggregated by student subgroup and school site, to ensure that district goals are aligned with student needs.

Goals shall be established for all students and each numerically significant subgroup as defined in Education Code 52052, which may include ethnic subgroups, socioeconomically disadvantaged students, English learners, students with disabilities, and foster youth, and shall address each of the state priorities identified in Education Code 52060 and any additional local priorities established by the Board. These goals shall be incorporated into the district’s local control and accountability plan (LCAP). (Education Code 52060, 52062, 52063; 5 CCR 15497)

The LCAP shall include a clear description of each goal, one or more of the state or local priorities addressed by the goal, any student subgroup(s) or school site(s) to which the goal is applicable, and expected progress toward meeting the goal for the term of the LCAP and in each year. (5 CCR 15497)

Each year the district’s update to the LCAP shall review progress toward the goals and describe any changes to the goals. (Education Code 52060-52061)

In addition to the goals identified in the LCAP, and consistent with those goals, the district and each school site may establish goals for inclusion in another district or school plan or for any other purpose. Such goals may address the improvement of governance, leadership, fiscal integrity, facilities, community involvement and collaboration, student wellness and other conditions of children, and/or any other areas of district or school operations. As appropriate, each goal shall include benchmarks or short-term objectives that can be used to determine progress toward meeting the goal.

USE OF TECHNOLOGY AND ELECTRONIC RESOURCES

The governing board recognizes the importance of student access to electronics-based research tools and to master skills which can be applied to the latest technologies which enhance learning, problem solving, and research skills. With these opportunities come responsibilities which require adherence to ethical and legal mandates associated with access to a myriad of such resources. It is the purpose of this policy to establish acceptable expectations regarding student and employee actions with respect to the use of district technology and electronic resources.

Providing students and employees with the opportunity to conduct curricular exploration and research through the use of technology and the Internet is an integral part of the educational process. Students and employees are encouraged to avail themselves of the information, knowledge, and materials available through electronic mail, other electronic learning resources, and the Internet for purposes of classroom assignments, research projects, or job-related activities as outlined in the Student Network/Internet Acceptable Use Agreement.

Use of the Placentia-Yorba Linda Unified School District's technology and electronic network system is a privilege and comes with much the same privileges and responsibilities associated with use of the library or other reference sources as outlined in the Student Network/Internet Acceptable Use Agreement. Access to the Internet is provided to students for purposes of learning, and therefore should be used for educational purposes, and in the case of employees, primarily for work-related purposes. Student and employee users should use discretion in their choice of materials and information viewed, and should respect current copyright laws.

Student Use of Technology

The Superintendent or designee shall notify students and parents/guardians about authorized student uses of district computers, user obligations and responsibilities, and consequences for unauthorized use and/or unlawful activities in accordance with district regulations and the district's Student Network/Internet Acceptable Use Agreement.

The Superintendent or designee shall provide age-appropriate instruction regarding the district's Student Network/Internet Acceptable Use Agreement, including instruction on the safe use of social networking sites and other Internet services including, but not limited to, the dangers of posting personal information online, misrepresentation by online predators, and how to report inappropriate or offensive content or threats.

The Superintendent or designee, with input from students and appropriate staff, shall regularly review this policy, the accompanying administrative regulation and other relevant procedures to help ensure that the district adapts to changing technologies and circumstances.

The Superintendent or designee shall ensure that all district Internet access has technology protection measures that blocks or filters Internet access to visual depictions that are obscene, pornographic, violent or harmful to minors, and that the operation of such measures is enforced.

The Board desires to protect students from access to inappropriate matter on the Internet. The Superintendent or designee shall implement rules and procedures designed to restrict students' access to harmful or inappropriate matter on the Internet. He/she also shall establish regulations to address the safety and security of students and student information when using email, chat rooms, and other forms of direct electronic communication, and other social networking sites deemed appropriate.

Before using district technological resources, each student and his/her parent/guardian shall sign and return a Student Network/Internet Acceptable Use Agreement specifying user obligations and responsibilities. In that agreement, the student and his/her parent/guardian shall agree to not hold the district or any district staff responsible for the failure of any technology protection measures, violations of copyright restrictions, or users' mistakes or negligence. They shall also agree to indemnify and hold harmless the district and district personnel for any damages or costs incurred.

Use of Student Personal Technology Devices for Online Services/Internet Access

The Superintendent or designee shall ensure that all students will have the opportunity to bring their own personal technology devices for academic use, under the guidelines of the Student Network/Internet Acceptable Use Agreement.

The Superintendent or designee shall ensure that all students have access to the district's electronic communications system for educational purposes while on the school grounds. The electronic communications system is defined as the district's network, servers, computers, mobile devices, peripherals, applications, databases, online resources, Internet access, email, and any other technology designated for use by students.

It will be each student's responsibility to follow the rules for appropriate and responsible use. Access to the district's network is a privilege and administrators and faculty may review files and messages to maintain system integrity and ensure that users are acting responsibly. The district is not responsible for technology devices that are brought to school from home by students or faculty members.
